Additional information:

[P.A. system] The P.A. needs to be large enough and well-suited for the venue.

[Technician] A technician with excellent knowledge of the P.A. system and the venue is required.

[Lighting] Vivid lighting and smoke-effects are appreciated.

[Microphones] Freddie's microphone should preferably be wireless.

[Monitors] The band prefers five separate groupings for the monitors. In case only four channels are available groups 4 and 5 are combined.

[Backdrop] A backdrop will be hung behind the drumset (2x2m).
